

OVER A CENTURY OF SERVICE

Montana Pharmacy Association

Fall CE Conference • Earn 0.8 CEUs

October 20 and 21, 2006

Best Western Great Northern

Helena, MT

The goal of this conference is to provide pharmacists with current practice information that can be applied across practice boundaries.

Program Overview

The 2006 Fall Continuing Education Conference will include eight (8) hours of continuing education addressing several important topics of current interest to practicing pharmacists. Participants will learn the current approach to Alzheimer's Disease treatment, what new vaccines are available and the most current immunization guidelines, and will be provided with an advanced introduction to Medication Therapy Management (MTM), with clinical examples using various disease states. In addition, new information on diabetes, diabetes treatment, and new product(s) will be introduced. The important issues of

patient safety and the pharmaceutical supply chain will complete Saturday's informational program.

Enjoy an afternoon of golf while networking and reconnecting with your peers; attend and participate in the MPA business meeting for updates from board members and an opportunity to dialogue with representatives of the Montana Board of Pharmacy. Attend this educational and informational program to become better informed, more knowledgeable of current practice issues, and better able to serve your patients and health care community.

Learning Objectives - At the conclusion of this conference, participants will be able to:

FRIDAY, OCTOBER 20, 2006

Alzheimer's Disease: Treatment Update 2006

Anthony Williamson, MD, PhD

ACPE # 035-999-06-008-L01

- List two clinical and two social implications of Alzheimer's Disease medication treatment.
- Recognize from a list, similarities and differences between specific Alzheimer's Disease medications.

SATURDAY, OCTOBER 21, 2006

PEDIGREE LEGISLATION and the Effect on the Pharmaceutical Supply Chain

Patrick Carpenter, MS, RPh

ACPE # 027-999-06-067-L03

Initial Release Date: June 27, 2006

- Explain the history of the Prescription Drug Marketing Act (PDMA)
- Summarize the stages of development of pedigree regulations on both state and federal levels
- Identify the consequences of a breakdown in the integrity of the pharmaceutical supply chain
- Recognize how drug pedigree relates to patient safety

Presented in collaboration with:

The University of
Montana

Skaggs School of Pharmacy

Skaggs School of Pharmacy at the University of Montana and Northeastern University Bouve College of Health Sciences School of Pharmacy are accredited by the Accreditation Council for Pharmacy Education as a provider of continuing pharmacy education. Programs listed in this booklet have been approved for ACPE continuing education credit as indicated. Individual program descriptions include the amount of credit offered and the universal program number. Statements of Credit will be mailed to participants within 4 weeks, upon successful completion of the verification of continuing education signature sheet and program evaluation form. No partial credit.

Learning Objectives - continued:

SATURDAY, OCTOBER 21, 2006

Pharmacy Practice: Clinical Update 2006

ACPE # 035-999-06-009-L01

Immunization Update - 2006

Sarah J. Miller, PharmD, MS, BCNSP

- Given a patient scenario, determine whether DTaP, Td, or Tdap is the appropriate vaccine for administration.
- Given an infant patient scenario (i.e., age, previous vaccine exposure, previous disease exposure), outline a rotavirus vaccine administration strategy.
- Compare and contrast varicella vaccine live and (Varivax,) and zoster vaccine live (Zostavax,).
- Identify three recent changes to recommendations for influenza vaccination.

Medication Therapy Management: Clinical Application, Step by Step

Paul Brand, PharmD

- Define Medication Therapy Management
- Recognize from a list provided, specific program criteria provided by Center for Medicare and Medicaid Services
- List steps to establish a pharmacist-based MTM program in a community or ambulatory practice setting

Clinical Application in Diabetes

Judy Gilman, APRN, CDE

- List 2 new categories of diabetes medications and one (1) indication for each
- List 2 indications and 2 contraindications for inhaled insulin
- Calculate the initial dose of inhaled insulin, given specific patient data
- Determine first line drug therapy for a diabetic patient scenario, and provide your rationale

This continuing education program was made financially possible by the following company:

FOREST PHARMACEUTICALS

Thank You!
